Meet Studio Wae

We make beautiful things from wa(e)ste

Studio Wae's vision is to extend the lifecycle of waste flows and to create job opportunities for people with a distance to the labor market. We believe it is important that everyone becomes aware that waste can have a positive value.

Modular rugs and flooring

Our unique rugs and flooring with geometrical shapes, are made of 100% production waste from sustainable high end carpet tile producers in the Netherlands. Collaboration with these pioneers prolongs the lifecycle of their waste. Choose any color, shape and size to create a unique rug or flooring that fits any space.

Social impact

The production of Wae's carpet collection is made by people with limited job opportunities, in our own workplace in Bunnik. Our mission is to employ as many people as possible with a distance to the labor market, offering them a solid base to build a future in the Netherlands.

- ✓ modular
- ✓ low carbon footprint

- ✓ social impact
- ✓ sound absorbing

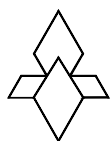

- ✓ custommade
- ✓ MIA Vamil

Circular paving

We also make circular paving that is made of 76% re-used raw materials, such as old pavement and rubble from the demolition.

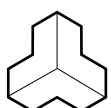

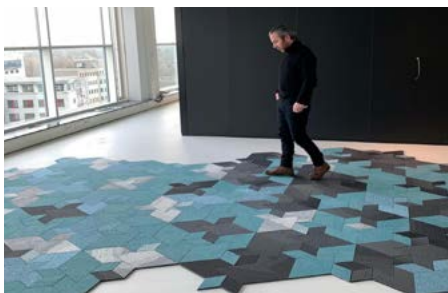

Modular rugs

The M.C. Escher-inspired shapes in our modular rug collection, are made from 100% waste material. Assemble your own color palette, design, shape and size. The special clicking system gives you complete freedom to create an unique project.

Modular entrance rugs & flooring

Your first impression often starts at the front door. Create an entrance mat in one of our designs.

As our flooring tiles are modular, it is easy to swap a tile when it is dirty or worn out. This extends the life of your project, because you only have to replace the dirty or worn part and leave in unwalked edges.

This product is a good example of a combination of functionality, quality and design.

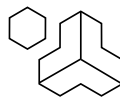

Modular wall tiles

Are you looking for a multifunctional and awesome acoustic wall solution? Choose your own shape, size and colors at Studio Wae. The designs are the same as our carpets but now made from acoustic and thicker material.

This material, needless to say, also comes from production waste. We provide extra layering and open lines on the tiles to absorb sound. Create your own Wæ on the wall!

Available in
these shapes:

This is the wæe

We have a stock of approximately 30,000 m² in over 500 colors. So there is always a color combination that suits your project. Visit our showroom and create your own wæe.
